DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 14-20, drawn to a method of treating a surface, classified in class 134, subclass 30.

II. Claims 21-28, drawn to an apparatus, classified in class 134, subclass 94.1.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the method as claimed can be practiced by another materially different apparatus which does not require a means for supplying a reducing gas into the process chamber or a means for promoting adhesion of CIF₃ gas to the object. For example the object can be placed in a sealed chamber and evacuated and cleaned with only CIF₃. The CIF₃ can then be purged from the chamber by introduction of an inert gas such as nitrogen.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Mr. Brett Martin on 6/25/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sharidan Carrillo whose telephone number is 703-308-1876. The examiner can normally be reached on Monday-Friday, 6:00a.m-2:30pm.
